

FIRE DATA LOGGER

Reliable Monitoring. Modern Safety.

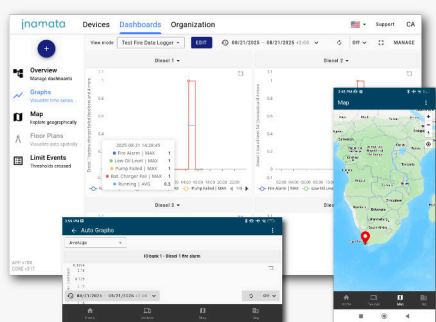

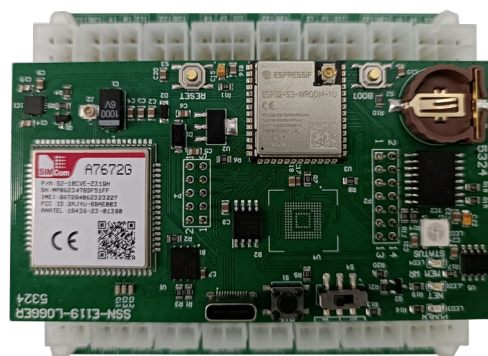

The simple-to-install LTE & Wi-Fi solution for fire suppression systems.

Maximize Safety. Minimize Operational Costs.

Unnoticed system faults aren't just a safety risk — they are a financial liability. The **Inamata Fire Data Logger** provides proactive oversight, instantly notifying technicians of activations or irregularities before they escalate into costly disasters.

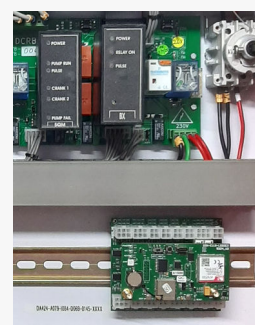

Key Benefits

- **Rapid ROI:** Reduce emergency repair costs by up to 40% through early fault detection and predictive maintenance alerts.
- **Instant Alerts:** Receive real-time notifications via Wi-Fi or LTE
- **Simplified Integration:** Mounts neatly inside cabinets (12–24VDC)
- **Automated Compliance:** Replace manual logs with secure cloud data, cutting audit time by over 60%.

Software & Setup

Monitor your systems from anywhere using our iOS, Android, and Web apps. Track historical logs, spot trends, and verify maintenance work with ease.

Tech Specs

Connectivity	Wi-Fi & GSM/LTE
Power Supply	12 – 24 VDC
Inputs	41x Digital inputs + RS485
Outputs	2x Relays
Storage	Local log storage + Cloud sync
Reliability	Battery-backed real-time clock
Configuration	USB-Serial terminal & Mobile App
Works with	Tank level, CO ₂ and VOC sensors
